

Outdoor

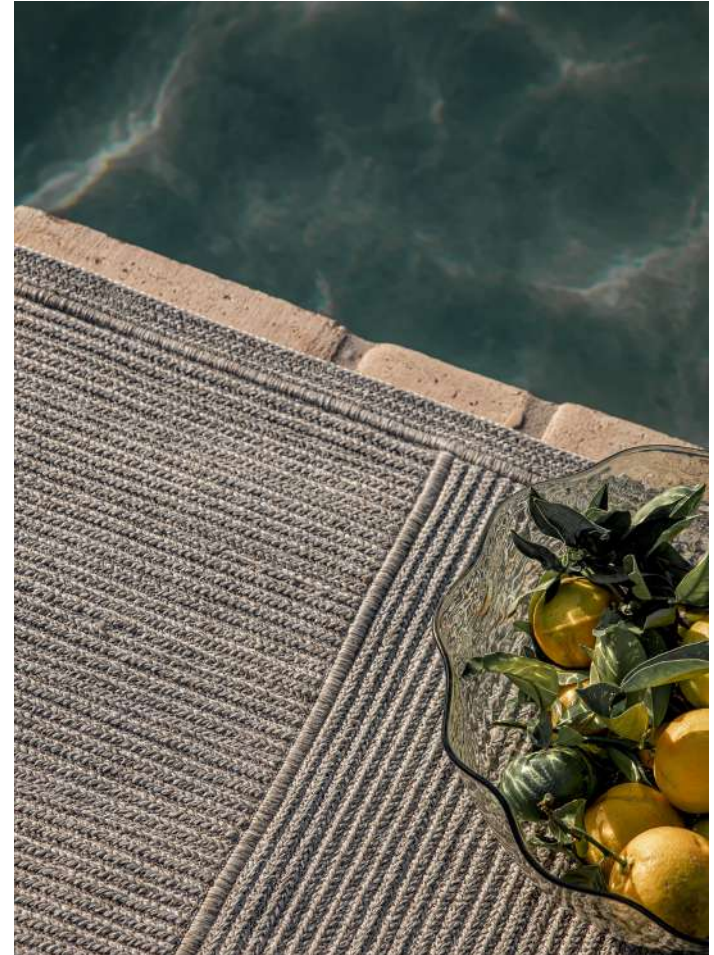

Cotlin Raw

Interior o exterior, lo esencial
es sentirse como en casa.

Indoors or outdoors, the
essential is feeling at home.

Desdibujando las fronteras de interior y exterior

El creciente interés por proyectar espacios cálidos y cómodos en el exterior, nos hace ampliar nuestro catálogo con nuevos modelos de alfombras. Además de su innegable aporte decorativo, las alfombras outdoor ayudan a desdibujar las fronteras entre dentro y fuera del hogar. En espacios contract o residenciales delimitan áreas específicas, marcan zonas de paso o ponen en valor piezas de mobiliario. Sin duda un aliado en el diseño de interiores.

Modelo: Diagonal Charcoal

Blurring the boundaries between indoors and outdoors

The growing interest in designing warm and comfortable outdoor spaces, makes us expand our catalog with new models of rugs. In addition to their undeniable decorative contribution, outdoor rugs help to blur the boundaries between inside and outside the home. In contract or residential spaces, they delimit specific areas, define passageways or highlight pieces of furniture. Undoubtedly an ally in interior design.

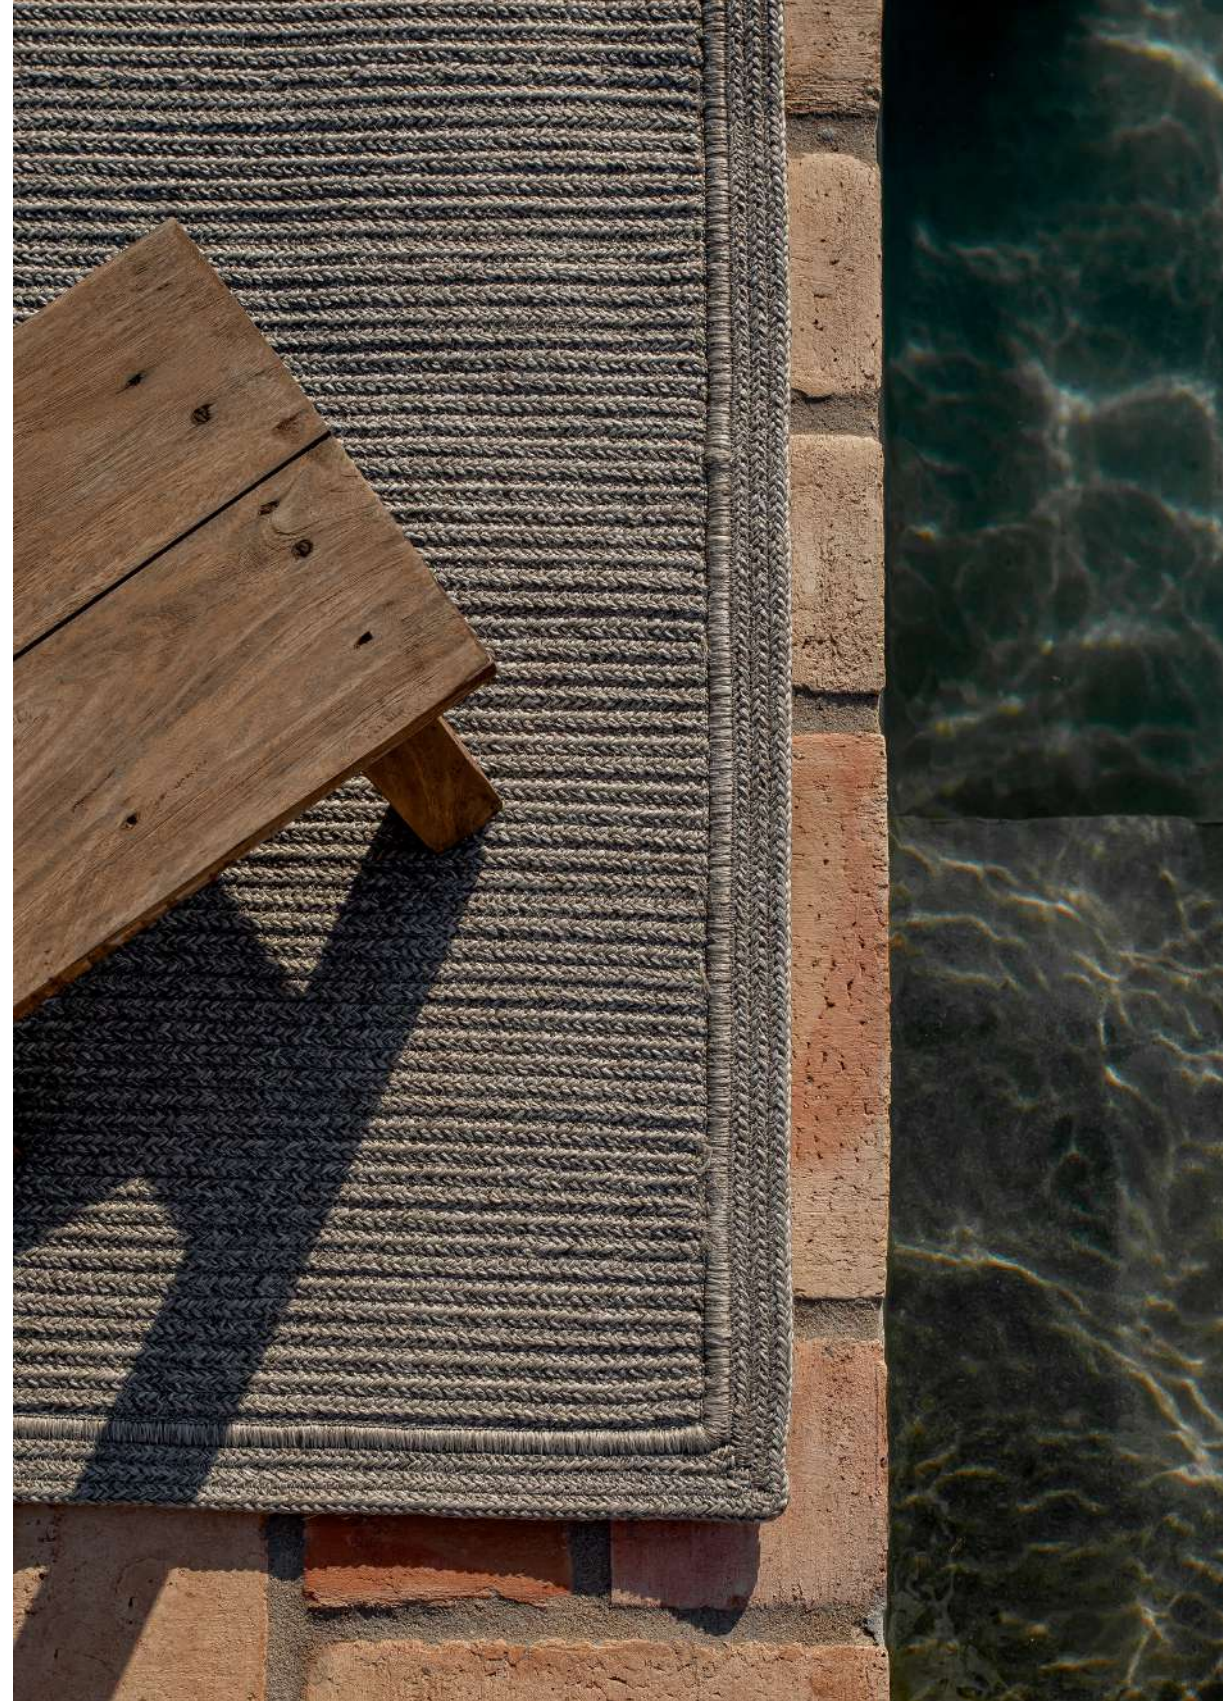

La colección Outdoor juega a prolongar la experiencia del interior, al exterior ¡y viceversa!

Busca crear ambientes relajados donde prima el disfrute gracias a la resistencia y fácil mantenimiento de sus alfombras. Fabricadas con polipropileno son resistentes a la intemperie, lo que las hace ideales para colocar en patios, terrazas, porches o cualquier otro espacio al aire libre. Asimismo, estas alfombras están diseñadas para resistir la decoloración y el deterioro causados por la exposición prolongada a la luz solar. Mantienen su color y apariencia a lo largo del tiempo.

The Outdoor collection plays to extend the indoor experience to the outdoors and vice versa!

It seeks to create relaxed environments where enjoyment is a priority thanks to the resistance and easy maintenance of its rugs. Made of polypropylene, they are weather resistant, which makes them ideal for patios, terraces, porches or any other outdoor space. Also, these rugs are designed to resist fading and deterioration caused by prolonged exposure to sunlight. They maintain their color and appearance over time.

Modelo: Sense Silver

Fibra sintética y práctica

Debido a sus múltiples ventajas, el polipropileno es una de las fibras sintéticas más utilizadas en la fabricación textil. El polipropileno es extremadamente resistente a la humedad, moho y manchas, lo que prolonga la vida útil de las alfombras realizadas en él. Se trata de un material de fácil mantenimiento y limpieza con excelentes propiedades de resistencia a la luz y por tanto, baja decoloración. Una fibra ampliamente utilizada en el mundo moderno.

Modelo: Fila Navy, Fila Latte, Sense Chocolate

Synthetic and convenient fiber

Due to its many advantages, polypropylene is one of the most widely used synthetic fibers in textile manufacturing. Polypropylene is extremely resistant to moisture, mould and stains, which prolongs the life of rugs made from it. It is an easy to maintain and clean material with excellent light fastness properties and therefore low fading. A fiber widely used in the modern world.

Colección Outdoor

Desde la India se incorporan diferentes modelos que de nuevo emplean el polipropileno, aunque esta vez con la técnica flatwoven o tejido a la plana, dando lugar a los 4 modelos siguientes:

Fila es un dhurrie con sutiles cambios de relieve.

Sense se produce cosiendo a mano en diferentes sentidos el cordón.

Diagonal se sirve del generoso y táctil trenzado para crear ritmos en la alfombra.

River alterna dos direcciones en el trenzado provocando un ligero movimiento visual.

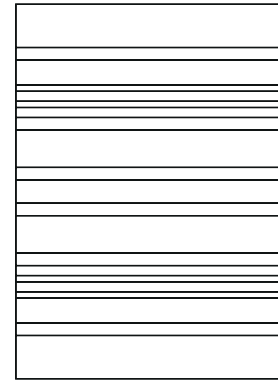

From India, different models are added using polypropylene, this although time with the flatwoven technique, giving rise to the following 4 models:

Fila is a dhurrie with subtle relief changes.

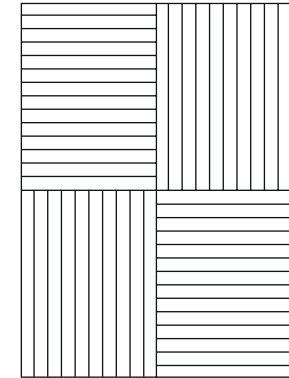

Sense is produced by hand sewing the cord in different directions.

Diagonal uses the generous and tactile braiding to create rhythms in the rug.

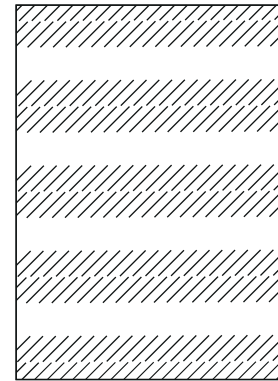

River alternates two directions in the braiding.

Martinica está creada a base de tiras de polipropileno trenzado, cosidas a mano. Realizada en Italia, ha conocido un éxito mantenido a lo largo de 10 años que la llevan ahora, a ampliar en nuevas variantes. A la gama de colores lisos de Martinica Plain, se suma Martinica Contrasted Edges que combina un toque de color en las costuras laterales. Y a la vez, Martinica Lines propone alegres secuencias de rayas que nos remiten directamente al verano, a los clásicos toldos, toallas, sillas plegables. Gran parte de la colección admite formato rectangular, cuadrado y redondo.

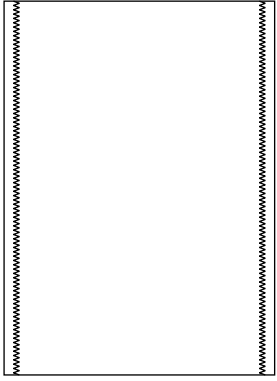

Cirros y Nimbus también realizadas en Italia son alfombras más sobrias y sofisticadas construidas gracias a trenzas de polipropileno cosidas en diferentes grosores.

Modelo: Martinica Lines Medium Off white

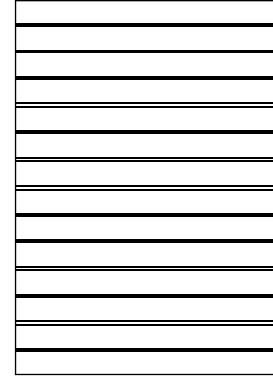

Martinica is made of braided polypropylene strips, sewn by hand. Made in Italy, it has enjoyed sustained success over 10 years, which has led it to expand into new variations. In addition to the range of plain colors of Martinique Plain, Martinica Contrasted Edges combines a touch of color in the side seams. And at the same time, Martinica Lines proposes cheerful sequences of stripes that take us directly to the summer, to the classic awnings, towels, folding chairs. A large part of the collection is available in rectangular, square and round formats.

Cirros and Nimbus, also made in Italy, are more sober and sophisticated rugs made of polypropylene braids sewn in different thicknesses.
